Dear Mrs. Li,

I read your message and heard about your situation from Ms. Hu Juan. May I ask if it's the problem of tuition that you can't let Qianqian attend the remote teaching lesson? If your answer is "yes," I can provide you a plan especially for Qianqian to continue learning. What do you think?

Message left by Mrs. Li, on November 2, 2010, 10:52:11 PM

Dear Mr. Tai, I'm amazed after reading your message. I felt like I just won a lotto prize. In fact, Qianqian and I all hope to continue learning from CMA. However, I indeed have financial difficulties. As you mentioned the discounted amount of tuition fee, I'm grateful but dare not accept. I could pay the appropriate amount, so that Qianqian can take this opportunity. What do you think?

Message left by Mr. Tai, on November 2, 2010, 11:36:44 PM

Dear Mrs. Li,

I know you're rich deep inside your heart. In reality, you just need more time and opportunity to create fortunes. I believe your economic situation will improve significantly in the future. I will offer a discounted tuition fee for Qianqian to receive the best educational quality, because that's my principle of life. You don't need to feel obligated. Remote teaching is the most scientific new teaching mode and much more effective. After Qianqian finishes 50 lessons, you will accept the new technology of unique teaching CMA provides. If you don't have any problem with it, please let her try out our first lesson tomorrow night at 8 to 9 o'clock. What do you think? I believe Qianqian can't wait to attend my abacus mental arithmetic class!

Message left by Mrs. Li, on November 3, 2010, 12:48:24AM

Dear Tai,

I'm extremely grateful for your help. Qianqian and I will work hard and make our best efforts in order to repay you. We will see you tonight at 8 to 9 o'clock.

Conversation between Mrs. Li and Mr. Tai via Skype during the course session on December 12, 2010:

From Tai: Mrs. Li, I have a suggestion for you. Qianqian will have a performance in the kindergarten. You can tell Qianqian's teacher that she can memorise the Philosophy of Success, but please ask Qianqian if she's willing to perform it and respect her will.

From Mrs. Li: I also asked Qianqian's teacher at the kindergarten, and they all are pleased to hear that Qianqian's learning abacus mental arithmetic.

From Tai: Good! Congratulations!

From Mrs. Li: The kindergarten wants to recruit more students, so they are holding a show for talent children to have performances.

From Tai: I understand. Then please try your best to help them to recruit more students and assist them to become a star

kindergarten.

January, 9, 2011

From Tai: $57+41-67+52-83+22+66+11-77+21+51=$ From Mrs. Li: 94

From Tai: Please enter the answer in the Internet practice

record.

From Mrs. Li: O.K. But the answer was calculated by Qianqian

using the abacus. From Tai: It's alright. I have something to discuss with you.

If Qianqian encountered difficulties while practicing mental arithmetic and felt bad, she will want to cry to give vent to her emotions. I'd let her cry. What do you think?

From Mrs. Li: OK. I agree with you. Qianqian's afraid to make mistakes. Even if I don't blame her, she will be mad at herself and

cry. From Tai: I know Qianqian is a perfectionist just like her mother. From Mrs. Li: She has a desire to be number one. Now whenever

she starts the computer, she immediately wants to check Enze's records. When she found Enze's place is in front of hers, she will skip breakfast and start to practise in order to surpass him.

From Tai: That's great. We should help her to achieve her goal.

From Mrs. Li: But I didn't ask her to do that. I'm afraid that she will be hurt in the future with this kind of attitude.

From Tai: Don't worry. Healthy competition is good. She wants to break her own records and show her talents. We should help her, so that we won't have conflicts with her.

I want to congratulate you on having such an outstanding daughter.

From Mrs. Li: That's because she has a great teacher like you.

From Tai: Competition is the human progress. If she is hurt, I am confident we can help her to get through it. Don't worry! This is a necessary process of a real life. We can thereby enhance our wisdom!
